Contract Genotyping Services

We are an independent molecular biology laboratory working on a contract basis with clients seeking to outsource routine genotyping and other biotechnological services. From our ISO 9001:2000 facility, we are committed to the needs of our clients, from entrepreneurs to multinational firms.

Genotyping Services:

DNA extraction

- DNA can be extracted from blood, fin clips, tails, plants and other samples.

Genotyping

- High-throughput genotyping using well developed highly variable microsatellite panels for a range of salmonids and finfish species, as well as wildlife.

Custom Genotyping

- We can develop a robust panel of genotyping markers for your species and application of interest.

Downstream Assistance

- We can help you use your genotype information to develop or enhance your broodstock, or to trace your stock within your production system or from farm-to-fork.

Applications:

Broodstock analysis and development

Stock tracking or QAQC verification

Population studies

We provide...

- Fast, accurate genotyping
- Sample archiving
- Competitive pricing - bulk pricing
- Strict client confidentiality
- Data interpretation

Contact

For further information on our genotyping services or to send samples please contact:
