Microbiology Services

RPC's Microbiology Laboratory has been providing diagnostic services to customers in the food, beverage, feed and environmental industry sectors for over 30 years. To keep pace with our customers' needs, we hold accreditation with the Standards Council of Canada and are Registered to the ISO 9001:2015 Standard.

Shelf-Life Assessments

For processors wishing to determine the microbial implications of the various stages of their manufacturing process, RPC offers shelf-life assessments to suit customers' specific needs.

Microbial Analyses

We provide the following microbial analyses for a variety of matrices, on a regular basis. For non-standard analyses, we can also develop a program to meet customer needs.

- Aerobic/Anaerobic sporeformers
- *Bacillus cereus*
- *Clostridium perfringens*
- Coliforms, Faecal Coliforms, and/or E.coli
- *Enterobacteriaceae*
- Heterotrophic Plate Count
- *Listeria monocytogenes*
- *Pseudomonas aeruginosa*
- *Salmonella spp.*
- *Staphylococcus aureus*
- Total Bacteria Count
- Yeasts and Molds

Results

Depending on the analysis, results are provided in report format within 1-5 days upon receiving your sample.

Sample Submission Forms

Please contact us and we will provide you with Sample Submission Forms to ease your paper burden in getting samples to us for analysis. You can also download forms from www.rpc.ca.
